

# HePaw Syn

**Identification:**

Complementary feed

**Animal category:**

Cats and dogs

**Composition:**

12.1.12 Yeasts products, 7.12.1 Mojave yucca (*Yucca schidigera*), 5.34.1 Thistle seed (Marian thistle grounded),  
11.2.12 Magnesium chelates (Lysine), 11.5.1 Potassium chloride, 11.4.1 Sodium chloride

**Ingredients:**

Crude ash:	11.4 %	Crude fibre:	2.8 %	HCl insoluble ash:	2.8 %
Crude protein:	38.6 %	Crude fat:	5.5 %		

**Additives / kg:***Technological additives:*

Bentonite (1m558i)	32 000 mg	L-Carnitine (3a910)	185 mg
Sepiolit (E562)	7 200 mg	Biotin (3a880)	75 mg

*Nutritional additives:*

Vitamin A (3a672a)	50 000 I.U.	Zink from Zinc chelate of amino acids hydrate (B.I.O.Key) (3b606)	3 500 mg
Vitamin D <sub>3</sub> (3a671)	25 000 I.U.	Manganese from Manganese chelate of amino acids hydrate (B.I.O.Key) (3b504)	450 mg
Vitamin B <sub>1</sub> (3a821)	1 000 mg	Copper from Copper(II) chelate of amino acids hydrate (B.I.O.Key) (3b406)	350 mg
Vitamin B <sub>2</sub> (3a825i)	1 450 mg	Iron from Iron (II) amino acids hydrate (B.I.O.Key) (3b106)	800 mg
Vitamin B <sub>6</sub> (3a831)	350 mg		
Vitamin B <sub>12</sub> (3a837)	750 µg		

*Zootechnical additives:*

Vitamin C (3a300)	5 000 mg	<i>Enterococcus faecium</i> (DSM 10663/NCIMB 10415) (4b1707)	5.0 x 10 <sup>11</sup> CFU
Vitamin E (3a700i)	7 500 mg	<i>Saccharomyces cerevisiae</i> MUCL 39885 (4b1710)	3.0 x 10 <sup>12</sup> CFU
Betaine from Betaine anhydrous (3a920)	38 800 mg		
Niacinamide (3a315)	150 mg		

**Recommended dosage:**

The powder should be sprinkled on top and mixed into the food carefully. If it is rejected by selective dogs and cats, the powder can be mixed into wet food shortly before administration. The product can be administered preventively on a permanent basis or acutely as a cure for 6-8 weeks.

## - Cats:

- o Kittens: 0.5 g/day
- o Adult cats: 1-1.5 g/day depending on body size

## - Dogs:

- o Puppies (1-3 months): preventive 0.5g per kg body weight/day, acute: 1g per kg body weight/day
- o Young dogs (3-6 months): preventive 0.6g per kg body weight/day, acute: 1.2g per kg body weight/day
- o Adult dogs (> 6 months): preventive 0.75g per kg body weight/day, acute: 1.5g per kg body weight/day

**Feeding advice:**

Due to the increased content of trace minerals, Vitamin D<sub>3</sub> and bentonite related to complete feed, this complementary feeding stuff should only be applied up to 5 % of the daily ration.

**Storage and stability:**

12 months after manufacturing date when stored in original packaging under cool (<25 °C) and dry conditions. Protect against direct sunlight and freezing.

**Packaging**

650 g tin

Version: 2

Erstellt: 10 / 2024
